

MEMORANDUM

TO: District Engineers

DATE: April 16, 2013

FROM: Gregg A. Freeby, P.E.

SUBJECT: Revised Miscellaneous and Retaining Wall Standard Drawings

Revised miscellaneous and retaining wall standard drawings, with a revision date of April 2013, are posted on the TxDOT web site and are available for immediate use.

Standard drawing Bridge Lighting Details, **BL**, is revised to add a 13" anchor bolt circle, provide recommended lighting bracket location in span, and to provide details for the location of junction boxes in bridge rails. In conjunction with this revision, the standard drawing Lighting Bracket for MSE Retaining Walls, **RW(LB)**, is revised similarly.

When including the **BL** standard in plans, reviewers are advised to check that the proposed lighting bracket locations are within recommended limits in the span.

These revised standard drawings apply to construction projects beginning with the October 2013 letting. Prior use is at the option of each District.

These and other bridge standard drawings are available on the Bridge Standards web pages in MicroStation® "dgn" and Adobe® Acrobat® "pdf" formats. See <http://www.dot.state.tx.us/business/standardplanfiles.htm> .

For questions or comments concerning these standard drawings, please contact Amy E. Smith, P.E., at (512) 416-2261 or Jon T. Ries, at (512) 416-2191.
