**Constrution Notes:**

- Galvanize all steel components unless otherwise noted.
- All other existing bolts in terminal connector must be used.
- All other existing holes in terminal connector must be used. Additional hole at bottom of two new 1" Dia holes as shown. Top new 1" Dia hole is used in lieu of existing top hole in terminal connector. Go on either side for opposite hand. Damage to galvanization caused by this modification must be painted with two coats of zinc-rich paint conforming to the Item “Galvanizing.”

**General Notes:**

- All other existing bolts in terminal connector must be used.
- Additional hole at bottom of two new 1" Dia holes as shown. Top new 1" Dia hole is used in lieu of existing top hole in terminal connector. Go on either side for opposite hand. Damage to galvanization caused by this modification must be painted with two coats of zinc-rich paint conforming to the Item “Galvanizing.”
