

MEMORANDUM

TO: All District Engineers

DATE: July 26, 2004

FROM: Zane L. Webb, P.E. *ZLW*

SUBJECT: 2004 Maintenance Standard Details

The Maintenance Division has developed the following standard sheets which may be used with the 2004 Specifications for Construction and Maintenance of Highway, Streets and Bridges.

Maintenance Standard	Name	Pages	Type Use
Sweeping Highways	SWEEP-04	1 of 1	Item 738 Cleaning and Sweeping Highways
Tree and Brush Removal	TRB-04(1)	1 of 2	Item 752 Tree and Brush Removal
Tree and Brush Removal	TRB-04(2)	2 of 2	Item 752 Tree and Brush Removal
Strip Mowing (Non-Divided Highways)	STRIP-MOW-ND-04	1 of 1	Item 730 Roadside Mowing
Strip Mowing (Divided Highways)	STRIP-MOW-D-04	1 of 1	Item 730 Roadside Mowing
Roadside Traffic Control Plan	RS-TCP-04	1 of 1	Traffic Control Plans for off highway maintenance

The standard for Roadside Traffic Control can only be used for maintenance work like mowing and litter pickup which is completely off of the roadway surface. This drawing is optional in lieu of the Barricade and Construction (BC) standards and the Traffic Control Plans (TCP) standards provided by the Traffic Operations Division. The other four standard sheets are provided to help clarify the standard specification items 730, 738, and 752. The use of these standards in lieu of details the districts are currently using is the District's option.

The standards are available on the TxDOT CAD Web Site at www.dot.state.tx.us/business/standardplanfiles.htm.

If you have questions or comments concerning the new standards, please contact Larry Buttler, P.E. at (512) 416-3240.
