**GENERAL NOTES (TYPE 1)**

1. The length of the type 1 construction exit shall be as indicated on the plans, but not less than 50 ft.
2. The course aggregate should be open graded with a size of 4" to 8".
3. The approach transitions should be no steeper than 6:1 and constructed as directed by the Engineer.
4. The construction exit foundation course shall be flexible base, subcontinuous concrete, portland cement concrete, or other materials approved by the Engineer.
5. The construction exit shall be graded to allow drainage to a sediment trapping device.
6. The guidelines shown herein are suggestions only and may be modified by the Engineer.
7. Construct exits with a width of at least 14 ft. for one-way and 28 ft. for two-way traffic for the full width of the exit, or as directed by the Engineer.

**GENERAL NOTES (TYPE 2)**

1. The length of the type 2 construction exit shall be as indicated on the plans, but not less than 50 ft.
2. The treated timber planks shall be attached to the railroad ties with 3/4" x 6" lag bolts. Other fasteners may be used as approved by the Engineer.
3. The treated timber planks shall be 2 x 6 grade min., and should be free from decay and loose knots.
4. The approach transitions shall be no steeper than 6:1 and constructed as directed by the Engineer.
5. The construction exit foundation course shall be flexible base, subcontinuous concrete, portland cement concrete, or other materials approved by the Engineer.
6. The construction exit shall be graded to allow drainage to a sediment trapping device.
7. The guidelines shown herein are suggestions only and may be modified by the Engineer.
8. Construct exit with a width of at least 14 ft. for one-way and 28 ft. for two-way traffic for the full width of the exit, or as directed by the Engineer.

**SECTION A-8 CONSTRUCTION EXIT (TYPE 3) SHORT TERM**

1. The length of the type 3 construction exit shall be as shown on the plans, or as directed by the Engineer.
2. The type 3 construction exit may be constructed from open graded crushed stone with a size of two to four inches spread 6 in. of 4" thick to the limits shown on the plans.
3. The treated timber planks shall be 2 x 6 grade min., and should be free from decay and loose knots.
4. The guidelines shown herein are suggestions only and may be modified by the Engineer.
