

# MEMO

March 22, 2016

**To:** District Engineers

**From:** Rene Garcia, P.E. *Rene Garcia, P.E.*  
Director, Design Division

**Subject:** Revised Roadway Standard

---

The following change has been made to the roadway standards sheets.

The standard sheet will be applicable to all new construction projects beginning with the June 2016 letting. The use of this sheet prior to that date is at the option of the district. The new standard is available from the Roadway Standards web page in Microstation® "dgn" and Adobe "pdf" format.

See <http://www.dot.state.tx.us/business/standardplanfiles.htm>. Please distribute this information to the appropriate district staff and area offices, as well as consulting engineers working on TxDOT projects.

The following represents the sheet change.

**REACT(N)-16** The REACT(N)-16 is a replacement of REACT(N)-13. The sheet has been modified to show the removal of the REACT 350 HS-B (70 mph) and the REACT 350 HS-C (70 mph) systems which are no longer being manufactured. Additionally, Note 1 has been changed to reflect the updated supplier contact information.

If you have questions or need additional information concerning this standard detail, please contact Kenneth Mora, P.E., Roadway Design Section Director, at (512) 416-2678 or me at (512) 416-2197.
