

MEMORANDUM

TO: District Engineers
FROM: Mark A. Marek, P.E.
SUBJECT: Revised Roadway Standards

DATE: June 14, 2010

The following changes have been made to the roadway standard sheets.

The sheets will be applicable to all new construction projects beginning with the December 2010 letting. The use of these sheets prior to that date is at the option of the district. The new standards are available from the Roadway Standards web page in Microstation® "dgn". See <http://www.dot.state.tx.us/business/standardplanfiles.htm>. Please distribute this information to the appropriate district staff and area offices, as well as consulting engineers working on TxDOT projects.

The following represents a summary of the individual sheet changes:

MBGF(SR)-10. The MBGF(SR)-10 is a new standard sheet that provides details for a metal beam guard fence radius rail using controlled release terminal posts. This standard should be used in conjunction with special provision 540-023. This sheet also includes a terminal anchor that may be used only on driveways when right of way is limited.

SGT(7)-10 & SGT(7)H-10. The SGT(7)-10 & SGT(7)H-10 are replacements of SGT(7)-09 & SGT(7)H-09. The quantity and size of the object marker shown on the bills of material have been updated.

If you have any questions or need additional information concerning these standard details, please contact Rory Meza, P.E., Director of the Roadway Design Section, Design Division, at (512) 416-2678.
