

MEMORANDUM

TO: District Engineers

DATE: July 1, 2004

FROM: Mark A. Marek, P.E.

SUBJECT: Revised Roadway Standards (English and Metric)

The following changes have been made to the roadway standard sheets.

The attached sheets will be applicable to all new construction projects beginning with the December 2004 letting. The use of these sheets prior to that date is at the option of the district. The new standards are available from the Roadway Standards web page in Microstation® "dgn". The following represents a summary of the individual sheet changes.

TWT-04 (English and Metric). These sheets represent the whitetopping concrete overlay details for thickness of 4 to 7 inches. The memorandum of June 28, 2004 from the Specification Committee approved the item of work for statewide use. The Special Specification numbers are 3432 (93) and 3002 (04).

BAS-94 (English and Metric). These sheets have been removed from the Roadway Standards and revised sheets have been added to the Bridge Standards.

EPIC (English and Metric). This design detail sheet has been revised to eliminate the requirement of an engineer's seal.

If you have any questions or need additional information concerning the concrete pavement standard detail, contact Dr. Moon Won, P.E., Rigid Pavements and Concrete Branch Manager for the Materials & Pavement Section, Construction Division, at (512) 506-5863. Questions concerning other roadway standard details may be directed to Rory Meza, P.E., Director of the Roadway Design Section, Design Division, at (512) 416-2678.

Original Signed by Mark A. Marek, P.E.
