**Subject:** Revised Roadway Standards

The following changes have been made to the roadway standards sheets.

The standard sheets will be applicable to all new construction projects beginning with the February 2020 letting. The use of these sheets prior to that date is at the option of the district. The new standards are available from the Roadway Standards web page in Microstation® "dgn" and Adobe "pdf" format. See <http://www.dot.state.tx.us/insddot/orgchart/cmd/cserve/standard/rdwylse.htm> Please distribute this information to the appropriate district staff and area offices, as well as consulting engineers working on TxDOT projects.

The following represents the standard sheets changed.

**SSCB(4)-19** The SSCB(4)-19 is a replacement of SSCB(4)-10. The standard has been updated to remove the ground rod and replace grounding capability by bonding the anchor bolts to the steel in the foundation. This makes this standard consistent with the application in the Traffic Division RIP and RID standards.

**CSB(4)-19** The CSB(4)-19 is a replacement of CSB(4)-10. The standard has been updated to remove the ground rod and replace grounding capability by bonding the anchor bolts to the steel in the foundation. This makes this standard consistent with the application in the Traffic Division RIP and RID standards.

If you have any questions regarding these, please contact Kenneth Mora, P.E., Roadway Design Section Director at (512) 416-2678.
