**Subject:** DMS-to-Truss Mounting with Horizontal Zee Extrusions (DMS(HZ)-21) Standard Sheets

New standard sheets have been developed that allow for the attachment of a Dynamic Message Sign (DMS) to a truss on an overhead sign support structure using Horizontal Aluminum Zee Bar Extrusions (DMS(HZ-1)-21 and DMS(HZ-2)-21).

The new standards are available from the Traffic Standards web page in MicroStation® “dgn” and Adobe® “pdf” format. See <http://www.txdot.gov/insdtdot/orgchart/cmd/cserve/standard/toc.htm>

The new standards may be used immediately and shall be used for all applicable PS&E sets beginning with the August 2021 letting. If you have any questions, please contact Tim Bradberry at (512) 416-2179.
