From: William L. Hale, P.E.
Chief Engineer

Subject: Revision of Traffic Control Plan Typical Details Standard Sheet WZ(TD)-17

The Traffic Control Plan Typical Details Standard Sheet WZ(TD)-17 has been revised to clarify and expand on the traffic control devices that may be used to temporarily separate two-way traffic on a normally-divided highway. Revisions to the sheet include:

- Allow Tubular Markers along with Opposing Traffic Lane Dividers (OTLDs) to be used for separation of two-way traffic under the conditions noted.
- Clarify the minimum size and base weight for the Tubular Markers
- Designate the retroreflective sheeting types and color for Tubular Markers detailed on this standard.

The standard may be used immediately and shall be used for all applicable PS&E sets beginning with the July 2017 letting.

The new standard WZ(TD)-17 is available in MicroStation and PDF formats at the following web address:
<http://www.dot.state.tx.us/insdtdot/orgchart/cmd/cserve/standard/toc.htm>.

If you have any questions, please contact Michael Chacon, Traffic Operations Division Director at (512) 416-3200.
