May 31, 2017

**To:** District Engineers

**From:** Michael A. Chacon, P.E. *M.A. Chacon, P.E.*  
Director, Traffic Operations Division

**Subject:** Temporary Large Roadside Signs Standard Sheets -TLRS (1-4)-17

---

The Temporary Large Roadside Signs (TLRS (1-4)-17) standard sheets are now available for use. These standards are the result of 3 years of Texas A&M Transportation Institute (TTI) crash testing research as documented in research reports 0-6782-1, 0-6782-2, and 9-1002-15-4. The research was performed to support roadway construction projects that typically require temporary large guide signs or 192"x96" 'Give Us a Brake' (G20-7T) signs.

With these standards, a contractor shall have the option of mounting temporary large roadside signs using any of three methods: wood embedment, steel embedment, or wood skid. Please contact Mark Johnson for use of a special specification to be used with these sheets in a plan set.

If you have any questions, please contact Mark Johnson at (512) 416-3247 or me at (512) 416-3200.
