

MEMORANDUM

TO: All District Engineers

DATE: April 16, 2003

FROM: Carlos A. Lopez, P.E.

SUBJECT: Revised BC (1)-2003 and BC (7)-2003

After extensive discussions with the Specifications Rewrite Committee and the Associated General Contractors, the Traffic Operations Division (TRF) has revised the BC (1)-2003 and BC (7)-2003 standard sheets. In general, the revisions to the notes on both of these sheets delineate TxDOT and contractor responsibilities in relation to the development and implementation of traffic control plans.

The revised notes have been denoted and a revised date has been added to the title block on the sheet. These revised standard sheets shall be used starting with the May 2003 Letting. The revised sheets have been posted on the TxDOT web site and the original version has been removed. The revised sheets are available on the TRF web site, under the section "Traffic Engineering Standard Plan Sheets" (English and Metric). The web site address is:

<http://www.dot.state.tx.us/insdtdot/orgchart/cmd/cserve/standard/toc.htm>

Please recycle any of the original versions that you may have printed and distribute the new sheets to the appropriate district staff and area offices as well as any consulting engineers currently working on TxDOT projects for your district.

The Austin Divisions will complete the addendums for all May 2003 Projects to change the revised sheets. We will also replace the sheets for any other projects that we are currently reviewing or have already been submitted. The district should replace the sheets in all projects currently at the district.

If you have any questions or comments concerning the new standards, please contact Greg Brinkmeyer at (512) 416-3120, Brian Stanford at (512) 416-2719 or me at (512) 416-3200.
