

MEMORANDUM

TO: All District Engineers

DATE: April 18, 2006

FROM: Carlos A. Lopez, P.E.

SUBJECT: New Standard Sheet – Exit Number Gore
Markings for Aerial View Detail PM (7)-06

Attached is a new standard sheet that should be used to place the exit number at gore locations. These markings are intended to assist with aerial surveillance during evacuations, incident management, or with local traffic reports.

If the roadway is considered a hurricane evacuation route, every effort should be made to install these markings at each exit (in both directions) before the start of hurricane season on June 1. If the roadway is not considered to be an evacuation route, then these markings should be added during the next striping project.

If you have any questions, please call Brian Stanford at (512) 416-3122 or me at (512) 416-3200.
