Paint, Anti-Graffiti

Material Producer List
Materials & Tests Division
## Paint, Anti-Graffiti

The following producers are pre-qualified to supply the following anti-graffiti coatings for use on Department projects and requisitions under DMS-8111, “Anti-Graffiti Coatings.” These materials require sampling and testing for product verification before use. Tex-736-I describes the sampling procedure.

The Department reserves the right to conduct random sampling and testing of pre-qualified materials to verify performance and Specification compliance and to perform random audits of documentation. Department representatives will select random samples from materials submitted to the Department on contracts or direct State purchase orders.

For more information, contact the Materials and Tests Division’s Coatings and Traffic Materials Section at (512) 865-1542.

### Type II (Solvent Cleanable)
