## Mechanical Couplers

The following mechanical coupler systems have been pre-qualified in accordance with [DMS-4510](#), “Mechanical Couplers for Reinforcing Steel.” These manufacturers have been pre-qualified to furnish these brand names and respective bar sizes for use on TxDOT projects. See TxDOT test method TEX-743-I for project sampling procedures.

“X” in the tables below indicate prequalification for a single bar size coupler as listed. “T#\_” in the tables below indicate prequalification for a transition coupler from the size in the heading to the size listed after the “T”.
