

CONSTRUCTION SCHEDULING

Darin Korbut
Construction Division

Construction Scheduling Overview

- Primavera
 - Requesting access to P6
 - Transitioning from P3
- Item 8 Updates
- Training Modules
- Work Authorization Process

- The Department is currently using P6 Version 6.2.1, which is only available through Citrix.
- Requesting P6 Citrix access.
 - For access to P6 you must submit a ticket through TxDOTNow requesting Citrix access to P6.
- Requesting P6 Databases.
 - Option 1: send an email to PMO_Helpdesk@txdot.gov to be granted access to the database and for instructions to map to the CST Database
 - Option 2: Some Districts may have the need to have a single database or multiple databases to manage projects. Contact CST for details.

- P3 is no longer supported by Oracle, and will no longer be required by specification.
- Districts should migrate from P3 to P6 as contracts allow.
- What to do about analyzing schedules that are in P3?
 - Due to the Refresh Initiative, Districts will need to retain computer and appropriate Windows software compatible with P3.
 - CST has retained a number of computers with P3 installed for use upon request.

Item 8 Updates

- Item 8 will be updated for the 2014 Spec Book
- It will no longer be software specific (i.e. P3 or P6)
- There will be three levels of schedules
- Current scheduling Special Provision 008-162

- CST is establishing a training curriculum for schedulers.
- DES 126 Time Determination Schedules, is the first class in the module and will be a prerequisite to CON 116.
- CON 116 Construction Critical Path Method Scheduling, is the next class, and is being updated. (Anticipate July 2014)
- An in depth schedule analysis class is in the development phase.
- The final class in the curriculum is CON 209 Dispute Resolution.
 - This class will be taught at the Districts request, for those that handle disputes.
 - The class will tie scheduling into the dispute resolution process.

PEPS Work Authorization Process

- The TxDOT PM (District) submits a request to the appropriate PEPS Service Center for a consultant to be assigned to handle the services needed.
- PEPS determines contract capacity and availability and designates a consultant to perform the required services.
- Contract and consultant contact information is sent to the TxDOT PM so they can begin fee negotiations.
- If the Work Authorization (WA) is under \$1M it can be approved at the District level.
- If the WA is \$1M or more it must be approved at the Division level.

PEPS Contact Information

PEPS Services Centers			
Service Area	Service Center (SC)	Service Center Manager	Contact Information
