TXDOT ENGINEERING SOFTWARE SUPPORT INFORMATION

TxDOT Core Logging and Foundation Design (WINCORE)

This document provides end-user support information for the TxDOT Core Logging and Foundation Design (WINCORE) application. This support information will be updated, as needed, to remain current.

CONTENTS

ABOUT WINCORE

Wincore analyzes and reports soil borings in accordance with TxDOT Standards. Wincore features core boring data entry, Laser printer output of boring logs, and performs foundation design. An associated MicroStation macro can access the .clg files for drawing the boring logs on layouts. The program has a Help file for documentation.
