

SH 105 Widening Project

From SH 6 to SH 249

TxDOT's Bryan District is developing plans to widen a 6.5 mile segment of SH 105 to reduce congestion, enhance safety, and improve regional mobility along the corridor.

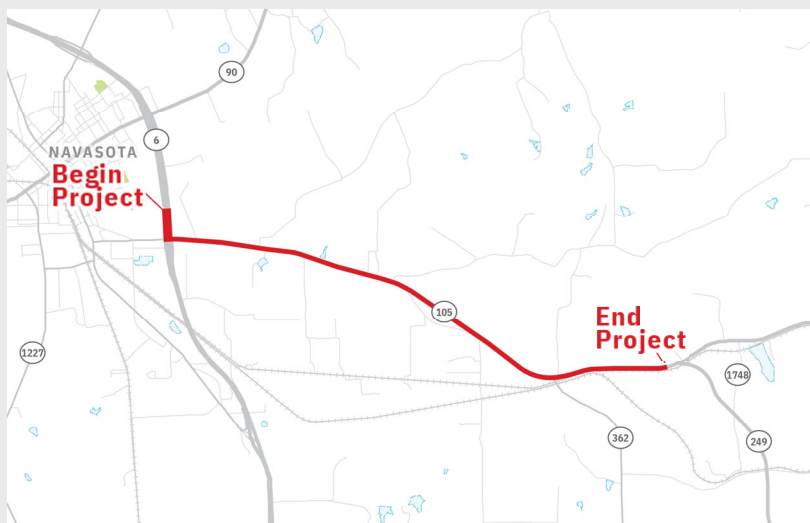

Proposed Improvements

- Widen the existing two-lane highway to a four-lane divided highway with two lanes in each direction, separated by a grass median.
- Construct a direct connect interchange at the intersection of SH 6 and SH 105 – the interchange would connect SH 105 westbound to SH 6 northbound and SH 6 southbound to SH 105 eastbound.
- Reconfigure the FM 362 intersection to a grade-separated overpass.

The proposed project would require right of way and potential business and residential displacements.

Estimated Project Milestones
