

Notice

Finding of No Significant Impact Available for Public Review

LOOP 88 SEGMENTS 1 AND 2

From US 84 (Shallowater) to US 62/82

CSJ(s): 1502-02-002, 1502-01-033

Lubbock County, Texas

This notice advises the public that the Texas Department of Transportation (TxDOT) has issued a finding of no significant impact (FONSI) for the proposed Loop 88 Segments 1 and 2, and that the FONSI is available for public review. The proposed project would construct an access-controlled freeway primarily along FM 2641 and County Road 3100 from US 84 near Shallowater to US 62/82 near Wolfforth in Lubbock County, Texas.

To avoid noise impacts that may result from future development adjacent to a proposed highway project, a traffic noise analysis is included in the final environmental assessment (EA), which includes predicted noise impact contours for currently undeveloped areas. These impact contours are intended as a general guide to assist local planning officials and developers plan and construct new activities in locations that would not result in traffic noise impacts.

On the date of approval/clearance of an EA/FONSI (including the traffic noise analysis) for a proposed highway project, TxDOT is no longer responsible for providing noise abatement for new development. Additionally, as TxDOT does not provide retroactive (retrofit) abatement (known as a Type II program), this project area would not be eligible for potential noise abatement until the next major highway improvement project.

The FONSI and approved final environmental assessment (EA) are available online at www.txdot.gov.

For further information or to request a copy of the FONSI and/or approved final EA, please contact Karen Bradshaw, environmental coordinator, (806)748-4377, karen.bradshaw@txdot.gov.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.
