

State Highway 4 (Boca Chica Blvd) Widening Project

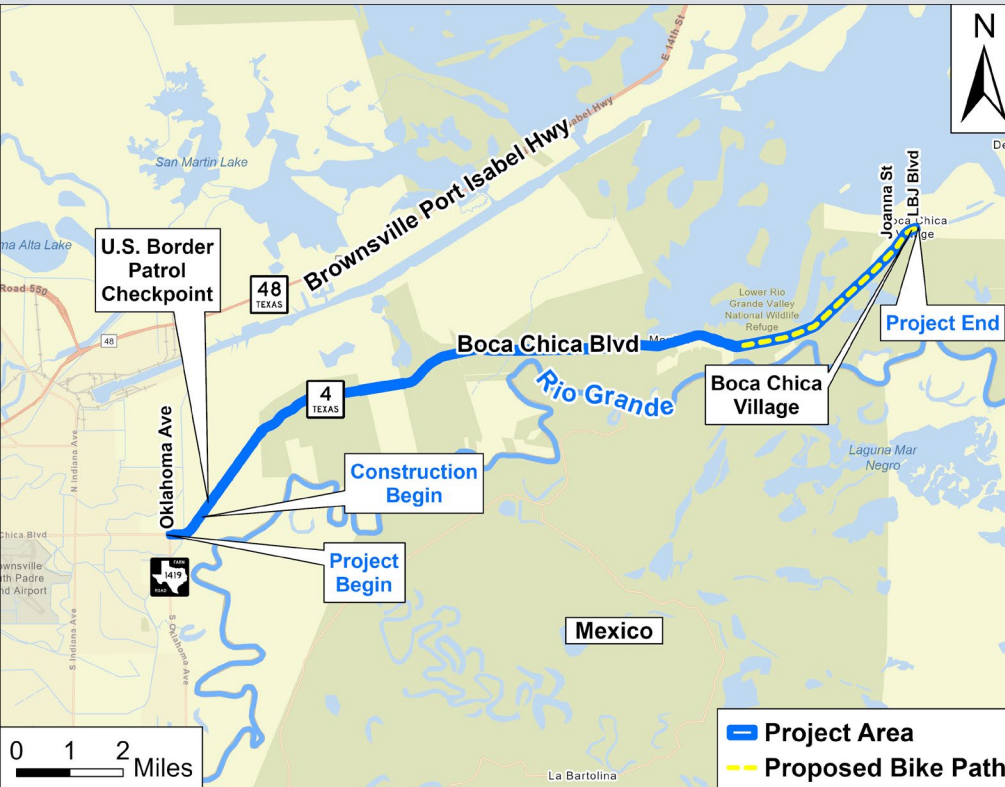

CSJ: 0039-10-091

TxDOT Pharr District

Project Overview

The Texas Department of Transportation (TxDOT) is proposing improvements to approximately 14 miles of State Highway (SH 4) from FM 1419 (Oklahoma Avenue) to LBJ Boulevard in Cameron County, Texas. The project would widen SH 4 (from 2,700 feet east of FM 1419/Oklahoma Avenue to Joanna Street) from a 2-lane roadway to a 4-lane divided roadway with two, 12-foot concrete travel lanes, 8-foot shoulders in each direction, and varying 4 to 12-foot flush paved median. All work is proposed within the existing 100 to 200-foot right-of-way.

Proposed improvements would also include an 8-foot bike path with 4-6-foot grass separation on the south side of SH 4 for approximately 3.75 miles from Quicksilver Avenue to LBJ Boulevard, including a one mile stretch past the road widening section to connect to a planned bike path.

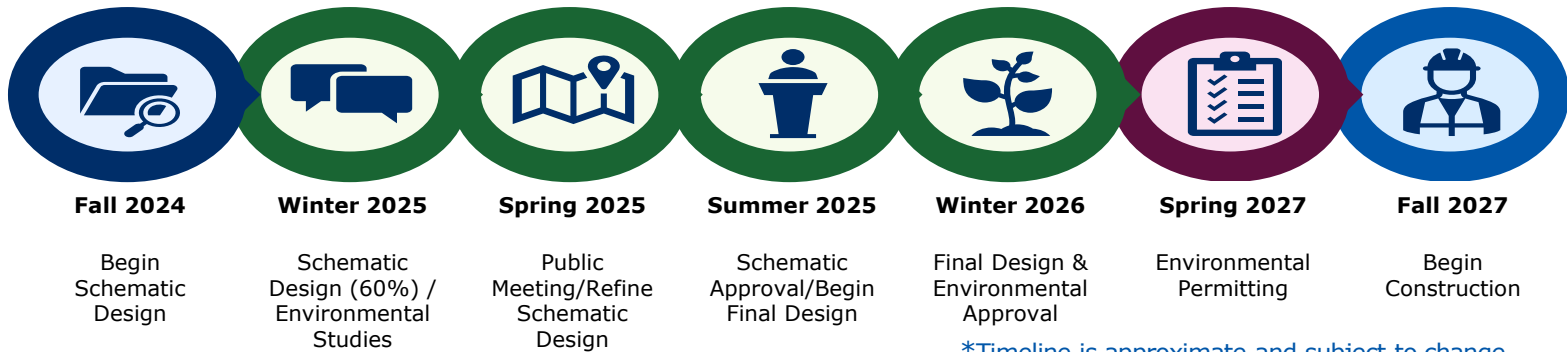

Project Purpose

- Improve mobility
- Improve safety
- Increase operational efficiency

Needs

- High crash rates compared to state average for similar roadway types
- Existing narrow paved shoulder
- Inadequate to meet traffic volumes
- Failing pavement

Anticipated Project Timeline*

Estimated Construction Cost: \$178.9M

*Timeline is approximate and subject to change
