

# RURAL TRANSPORTATION IMPROVEMENT PLAN 2025-2028

Yoakum District  
Virtual Public Meeting

April 25, 2024

Welcome to the Yoakum District’s Rural Transportation Improvement Plan Virtual Public Meeting for the 2025-2028 program! We are here today to go over the projects to be included in the upcoming 2025-2028 Rural TIP.

## Agenda

- 1 Safety Minute
- 2 Yoakum District & its boundaries
- 3 The Rural Transportation Improvement Program (TIP)
- 4 How the Rural TIP Impacts You
- 5 How Projects are Selected for the Rural TIP
- 6 Projects by County
- 7 Funding
- 8 Next Steps

### **Script:**

Today we will go over the counties in the Yoakum district and all the roads under the district's care. We will also review the basics of what is the Rural TIP? and why is it important for you to be here with us today. We will explain how the projects included in the program are selected and classified in order to make the most of the program.

Once you understand all of this, you will have the opportunity to review all the projects the Yoakum District has included in the 2025-2028 program. Both the big projects and the small supporting projects.

We will also go over funding, answering questions on "where does the money to pay for these projects come from? and how it get distributed?".

Lastly, we will outline all the options you have to comment on these projects and their priority.

November 7, 2000 was the last deathless day on Texas roadways.

Help us end the streak of daily deaths, Texas!

# #EndTheStreakTX

End the streak of daily deaths on Texas roadways.

## Safety Never Stops!

2025-2028 Rural TIP

April 25, 2024

3

First we will take a moment to talk about safety.

It almost happened. The long and heartbreaking 23-year streak of daily deaths on Texas highways almost ended. Almost.

On one day in February, Texas experienced a single traffic fatality – well below the average of 12 roadway deaths that occur daily on roadways statewide.

While fewer fatalities is worth noting, the sad fact remains that the streak of daily deaths has continued since Nov. 7, 2000. But that momentary improvement illustrates that the push for engineering safety enhancements and public education can produce positive results. The harsh reality remains, however, that the deadly streak continues and more than 83,000 people have lost their lives on roadways since the streak began.

“Each life lost means a family, neighborhood and community are impacted for a lifetime, and we take safety very seriously as we work to end this horrible streak,” said TxDOT Executive Director Marc Williams. “But it’s going to take all of us working together to get this done.”

TxDOT has committed to enhancing safety on Texas roads, investing \$17 billion in safety improvements through the state’s 10-year plan. TxDOT has also developed new changes that may seem small, but could have a major impact:

- Increasing the size of pavement striping from 4 inches to 6 inches. This enhances the visibility of striping on the roadways and encourages drivers to slow down.
- Providing a wider centerline buffer between double yellow stripes with rumble strips or raised pavement markers on undivided highways to alert drivers when they cross the centerline.
- Building innovative intersections like roundabouts, where appropriate, can decrease fatalities at intersections by 90%.
- Implementing a “Safer by Design” program to give roadway designers a way to model safety performance from most of the key design elements used in projects.

Engineering, education and enforcement will always be the key components of traffic safety programs. While TxDOT builds engineering improvements, drivers can help keep themselves safe on the road. For example, 48% of deaths on Texas roads are from people not wearing their seatbelt inside a vehicle. That one click can have a major impact on fatalities. We all have a shared responsibility to keep our roads and fellow drivers safe.

TxDOT is asking all Texans to do any or all the following to raise awareness:

- ☐ Make the best and safest decisions behind the wheel, don’t drive under the influence of alcohol and/or drugs; always obey traffic laws; always wear your seatbelt.
- Post pictures on social media with this [downloadable sign](#) displaying the hashtag #EndTheStreakTX.
- Share personal stories on social media of loved ones who have been lost in a crash and use the hashtag #EndTheStreakTX.
- Follow @txdot social media pages and share the content we post.

Together, we can save lives and end this streak of daily deaths.

## District Boundaries

## Yoakum District

2025-2028 Rural TIP

April 25, 2024

4

### **Script:**

The Yoakum District includes all of the counties shown in the map. Projects included in the 2025-2028 Rural TIP are located in *De Witt, Lavaca, Gonzales, Fayette, Austin, Colorado, Wharton, Matagorda, Calhoun, Jackson, and Victoria* counties.

### THE RURAL TIP

is list of all added capacity and regionally significant projects to be funded within a TxDOT District during the next four years, including those eligible for federal funding.

It can include projects for :

A Rural TIP project is anticipated to be funded within the next 4 years.

It shows regional agreement (community-region-state) on the need of a project.

### Script:

The Rural Transportation Improvement Program is a list of local projects to be funded in a TxDOT District over the next 4 years. This means that all projects included in the list are expected to be underway within 4 years following its approval. These are the changes you can expect to go to contract in the near future!

It is multimodal; which means that it can include projects relating to highways, bicycle and pedestrian facilities, transit services, and freight projects as well as the preliminary studies used to define those projects.

Rural TIP is meant to show regional agreement on the need and priority of a transportation project, so all parties involved can be sure they are making the best investment for the community. It is also expected to be consistent with the projects and objectives included in the regional Long Range Transportation Plans, to ensure that all agencies are working towards the same goal.

The Rural TIP is a part of the Statewide Transportation Improvement Program (STIP). Because the program's rules are established by Federal law, no project can receive federal funding unless it is listed in the Rural TIP!

## How the Rural TIP Impacts You

The Rural TIP process includes opportunities to provide input on the priority of major projects that are listed on it.

Local and small projects around your community dealing with safety and access also get funding through the Rural TIP, for example:

*Road expansions*

*Sidewalks*

*Bike lanes*

*Pavement repair or maintenance*

*New or improved signals*

*Turning lanes*

**By participating today, you are providing input in [number of projects included in this Rural TIP] projects!**

**You know your  
community  
best!**

**Tell us what  
project  
should come  
first and why**

### **Script:**

It is important for you to participate because funding secured by this process is intended to address your communities' most immediate needs. By providing comments on the priority of the projects included, you are helping us identify regional priorities.

By reviewing the entire program in a single meeting you are: 1) having a regional impact, 2) helping us be more effective with your money, and 3) ensuring that we are investing where we should.

## How Projects are Selected for the Rural TIP

Projects are identified and selected by evaluating existing and future needs based on:

current conditions and projections, statewide and regional plans, public input regarding transportation priorities

*^ This would be you, right now!*

*For Example:*

2025-2028 Rural TIP

April 25, 2024

7

### Script:

Rural Transportation Organizations, Metropolitan Planning Organizations and local governments are responsible for selecting projects within their boundaries

TxDOT, through the District office, is responsible for selecting of all projects relating to the State Transportation System and other National roadways. This includes Interstates, State and US Highways but most importantly this can also include the Farm-to-Market and Ranch-to-Market roads you use every day. The projects you will review today should respond to local needs!

It is our responsibility to provide you with the opportunity to provide input on which projects should be advanced.

Selected projects are separated into  
**2**  
main categories

### 1. Regionally Significant Projects

Those with the appropriate scale or reach to be considered as stand-alone projects in a given program year have their own category.

### 2. Grouped Projects

Those without the scale to stand on their own are grouped into one of 12 subcategories and considered as a single line item in the list.

#### **Script:**

Once projects have been defined, they are evaluated according to their scale and classified according to the funding they require as well as their potential impact.

Big projects are categorized as Regionally Significant Projects and are included as stand-alone items. *i.e. A new bridge over a river*

To simplify this budgeting and planning process, smaller projects are lumped together into 12 separate subcategories, refer to as Grouped Projects. Grouped projects include things like landscaping, safety lights, or new bicycle and pedestrian facilities. These grouping practice makes facilitates the federal funding of smaller projects. *i.e., the pavement repair of an FM road.*

## Area Engineers

**Ryan Simper, P.E.**

**Wharton Area Engineer**

**(979) 532-3141**

**Wharton, Austin, Colorado,  
and Matagorda Counties**

**Clayton Harris, P.E.**

**Victoria Area Engineer**

**(361) 573-9251**

**Victoria, Jackson, and  
Calhoun Counties**

**Covey Morrow, P.E.**

**Yoakum Area Engineer**

**(361) 293-4399**

**De Witt, Gonzales, Fayette,  
and Lavaca Counties**

Before get to the projects let's review over who is the Area Engineer for your region. Ryan Simper is the Wharton Area Engineer that covers Wharton, Austin, Colorado and Matagorda counties. Clayton Harris is the Victoria Area Engineer that covers Victoria, Jackson, and Calhoun counties. And Covey Morrow is the Yoakum Area Engineer that covers the De Witt, Gonzales, Fayette, and Lavaca counties.

\*\*\*Project(s) not fully funded

**Script:**

The table shows the details of projects included in the 2025 - 2028 Rural TIP for Lavaca County. Please pause at your own convenience to view the project list.

The Rural TIP is a list of projects that functions as a budgeting tool for our District.

Funds can come from:

### Federal Government

*Through the Federal Highway and Transit Administrations*

### TxDOT

*Through its Unified Transportation Program funding categories*

### Local governments

*Who may be required to provide matching funds for federal monies*

### Script:

The Rural TIP functions as a budget list for the District. Like the budget of a household, the Rural TIP has to be realistic about the amount of money available to covers all the needs. Frequently we identify more improvements than we have money to implement. This means prioritizing according to those items that are most necessary.

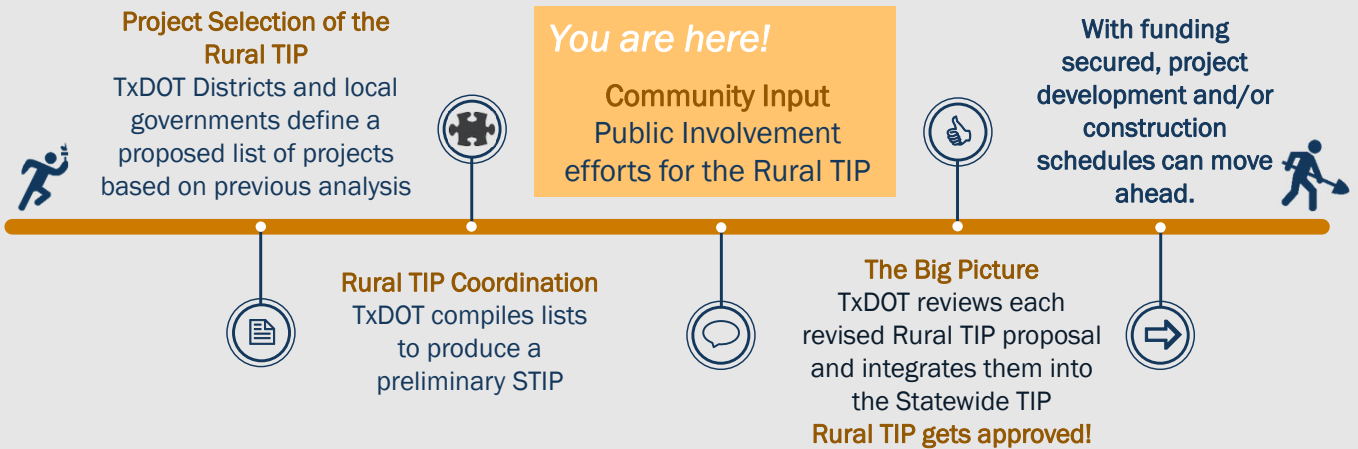

We've discussed the list but where is the money coming from? Funds can come from 3 main sources:

- 1) The Federal Government, through the establishment of the Infrastructure Investment and Jobs Act (IIJA), the federal government allocates these funds through the processes established by the Federal Highway and Transit Administrations.
- 2) TxDOT, like the Federal Government also allocates a section our budget for these projects through the Unified Transportation Program's 12 funding categories.

And 3) the local governments. Once the need has been identified and the amount of federal monies has been defined, the Rural TIP helps local governments assess the funding requirements to match those of the federal and state government and their capacity to meet them.

## In the Rural TIP Process

Now, after you review and comment on these projects, what is next? The timeline above illustrates the Rural TIP process and where we are right now. Once your comments have been collected and considered, if necessary the Districts will provide TxDOT with a revised Rural TIP for approval and integration into the Statewide document.

The Statewide Transportation Improvement Program is built from the Rural TIP of all the 25 Districts in the State as well as the Transportation programs from all the MPOs. The timeline above shows where the Rural TIP process fits into this larger effort. Once the STIP is approved by the Federal government everyone's projects are funded and becomes one step closer to getting on the ground.

## How to provide comments:

**1. Mail a comment to:**

Texas Department of Transportation  
Yoakum District, Attn: Rural TIP  
403 Huck Street, Yoakum, TX 77995

**2. Or email a comment to:**

[Jeffery.Vinklarek@txdot.gov](mailto:Jeffery.Vinklarek@txdot.gov), Attention: Rural TIP.

Remember to submit your comments by **May 6, 2024** to be included in the official summary of this meeting

**Script:**

Now that you are familiar with the Program, we want to hear what you think. Go ahead and fill a comment card and mail it back to us at the address on the screen.

You can also email in your comments to: [Jeffery.Vinklarek@txdot.gov](mailto:Jeffery.Vinklarek@txdot.gov) Attn: Rural TIP

Comments must be postmarked or otherwise received by May 6, 2024. Please make sure to send your comments before that date.

If after today, you would like more information or have any other questions feel free to reach out or visit the District Webpage for updates.

Remember, if you wish to discuss this information with your friends or family, please direct them to this website and remind them to make sure they send any comments in before May 6, 2024.
