

I-35 from RM 1431 to FM 3406 (northbound)

CONSTRUCTION INFORMATION

Project Overview

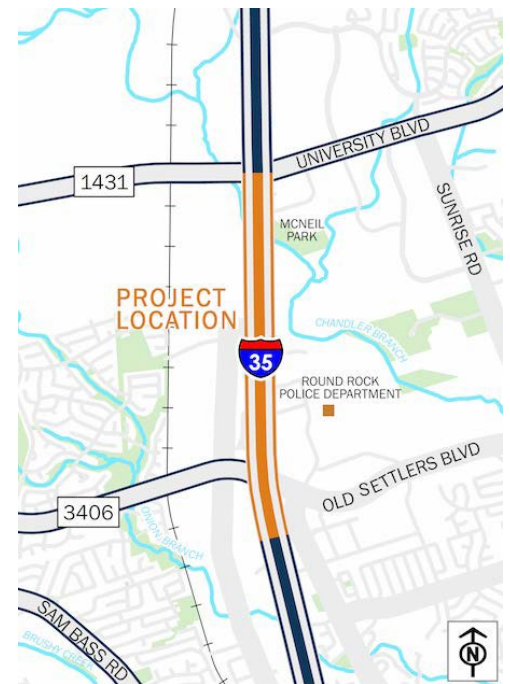

The I-35 from RM 1431 to FM 3406 (northbound) project addresses safety and mobility in Williamson County by adding a lane to the northbound I-35 frontage road and relocating an exit ramp. Lack of mobility on I-35 threatens the economic livelihood of Texas. With more than 145,000 vehicles traveling on this segment of I-35 each day, this project will improve mobility, safety and connectivity for all modes of transportation along I-35.

Work includes relocating the existing exit ramp on the northbound I-35 frontage road to reduce congestion on the mainlanes. The project will also improve the northbound frontage road by adding an extended exit lane between RM 1431 and FM 3406.

Construction Phases

Work on this improvement project will take place in five phases:

- **Phase I** work includes setting up detours, shifting traffic, installing temporary drainage, beginning the auxiliary lane extension and starting work on the new exit ramp
- **Phase II** work includes installing a temporary traffic barrier and striping for traffic shifts, closing the existing exit ramp, opening the new exit ramp, finishing work on the auxiliary lane and extending the west side of the frontage road
- **Phase III** work includes opening the new auxiliary lane to traffic, shifting traffic and constructing the new entrance ramp and the remainder of the west side of the frontage road
- **Phase IV** work includes completing all paving and drainage operations for northbound I-35 mainlanes and frontage road
- **Phase V** work includes installing the final overlay and striping to open all lanes and ramps

Details

This \$10.7 million project is funded by Capital Area Metropolitan Planning Organization (CAMPO) and TxDOT. Construction began in mid-2019 and is expected to be complete in mid-2021, weather permitting. The contractor is Jordan Foster Construction.
